AT INDUSTRIAL DOWN DRAFT WORKBENCHES

Model 3636E shown with hinged wing panels. Note that no view window is mounted with this option.

Model 4744 shown with hinged wing panels.

AT Industrial down draft workbenches set the standard for efficiency and versatility. This rugged down draft workbench can be attached to a wet or dry dust collector. The fiberglass work grate minimizes any chance to scratch the part. Vapor and dust tight T8 fluorescent lighting is standard on every bench. All benches are powder coated for durability. Polyethylene benches are available for spark critical applications.
